(54) **Compositions for use in the treatment of aphthous ulcers and other mucocutaneous disorders.**

(57) A method of treating aphthous ulcers and other mucocutaneous disorders is disclosed. The method comprises contacting the mucocutaneous disorder with a composition in the form of a paste, solution, gel, quick-disintegrating tablet, mouthwash, ointment, cream, powder, adhesive patch, aerosolized spray, lozenge, troche, dentifrice, or dental floss that contains an effective amount of one or more compounds having the following biochemical/biological properties: mediator release inhibitors, 5-lipoxygenase inhibitors, leukotriene antagonists, and platelet-activating factor antagonists.

CLAIMS INCURRING FEES

The present European patent application comprised at the time of filing more than ten claims.

- ☐ All claims fees have been paid within the prescribed time limit. The present European search report has been drawn up for all claims.
- ☐ Only part of the claims fees have been paid within the prescribed time limit. The present European search report has been drawn up for the first ten claims and for those claims for which claims fees have been paid, namely claims:
- ☐ No claims fees have been paid within the prescribed time limit. The present European search report has been drawn up for the first ten claims.

LACK OF UNITY OF INVENTION

The Search Division considers that the present European patent application does not comply with the requirement of unity of invention and relates to several inventions or groups of inventions, namely:

see sheet -B-

- ☐ All further search fees have been paid within the fixed time limit. The present European search report has been drawn up for all claims.
- ☐ Only part of the further search fees have been paid within the fixed time limit. The present European search report has been drawn up for those parts of the European patent application which relate to the inventions in respect of which search fees have been paid, namely claims:
- ☒ None of the further search fees has been paid within the fixed time limit. The present European search report has been drawn up for those parts of the European patent application which relate to the invention first mentioned in the claims, namely claims: mentioned in item 1.

European Patent
Office

EP 92 47 0014 -B-

LACK OF UNITY OF INVENTION

The Search Division considers that the present European patent application does not comply with the requirements of unity of invention and relates to several inventions or groups of inventions, namely:

1. Claims 1,2,14-20 (partially); 3,4
2. Claims 1,2,14-20 (partially); 5,6
3. Claims 1,2,14-20 (partially); 7,8
4. Claims 1,2,14-20 (partially); 9,10
5. Claims 1,14-20 (partially), 11-13

The common concept linking the claimed different classes of compounds (mediator release inhibitors, 5-lipoxygenase inhibitors, leukotriene antagonists, PAF-antagonists and the compounds of claims 11-13) seems to rely in that the same diseases are treated by these different classes of compounds.

As the use of one of these classes of compounds (mediator release inhibitors) for the treatment of diseases falling within the scope of "other mucocutaneous disorders", e.g. ulcers or ulcerative colitis, is already known, the abovementioned common concept is not novel, and therefore cannot be inventive in the meaning of Art. 82 EPC.
